

PROPERTY STORMWATER DRAINAGE

OPTIONS:

1. Direct stormwater to your yard away from your foundation.
2. Direct flow to gardens, swales, ditches, soak-away pits, and towards streams, and lakes.
3. Underground pipes like sump pumps and foundations can connect to the underground Halifax Water Stormwater System (downspouts cannot.) Get a permit.

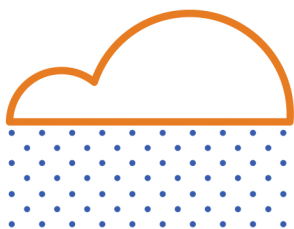

NOTE:

This is general information. Consider your specific property conditions. You may wish to consult with a professional.

AVOID:

1. Water backups and frozen pipes. Slope pipes downhill.
2. Flooding your neighbour.
3. Icing problems in the street and/or sidewalks.
4. Soil erosion and sediment transport.
5. Stormwater can not enter the Halifax Water Wastewater System.
