

February 7, 2019

This spring, Halifax Water will be upgrading infrastructure on **Coburg Road between Oxford Street and the CN Rail Bridge**. Halifax Water's work will include a new water main on Coburg Road, and upgrades to the water and sewer system in the intersection of Oxford Street and Coburg Road. Limits of the work are identified on a map on the reverse.

Halifax Water is hosting a Community Information Session

When: Wednesday, February 20th, 6:30 PM to 8:30 PM

Where: Saint Mary's Boat Club (1641 Fairfield Road, Halifax)

Anyone interested in or affected by this project is welcome to drop-in at any time during the session. There will be no formal presentation; there will be display boards and staff available to answer questions.

In order to continue access for residents who use lower Coburg Road, a temporary single lane road will be constructed connecting Waegwoltic Avenue and Coburg Road. This road will be open during critical points of the project when access via Oxford Street cannot be maintained. The trail will be reinstated upon completion of the work to current urban trail standards. Cross sections of the temporary road and final reinstatement are below, and the routing is shown on the map on the reverse.

Typical Section - Temporary Roadway/Walkway
(Not to scale)

Active Transportation Trail - Final Reinstatement
(Not to scale)
