Project Update - Week of August 26

Section 1 (see project map)

Monday, August 26 - Friday, August 30

- Backfill of Precast Channel
- Grading
- Replacing Stream Bed

Section 2 (see project map)

Monday, August 26 - Friday, August 30

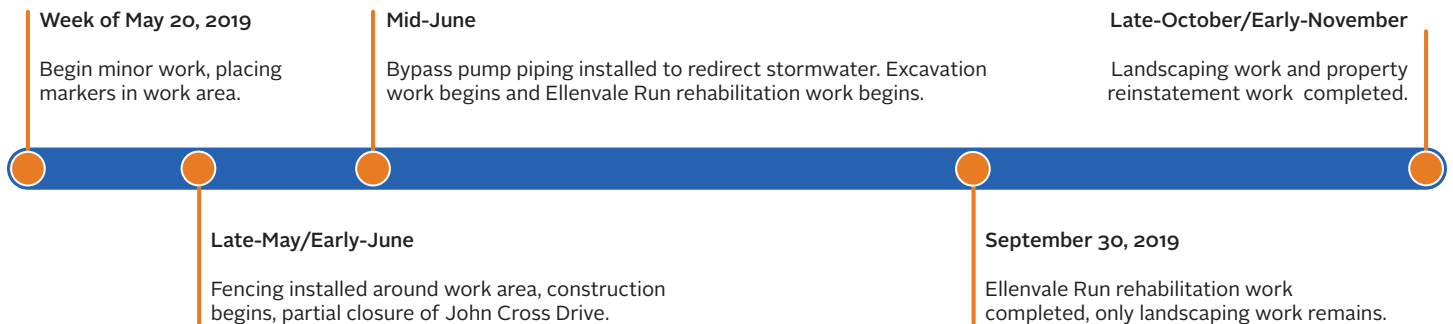

- Installation of Precast Channel
- Backfill of Precast Channel
- Grading

Safety Reminder

The work going on along Ellenvale Run is certainly interesting to watch, but we ask that all residents and onlookers view the work being completed from a safe distance. Safety barricades and fences have been installed for the safety of the public and the workers completing this work. Please stay well outside of these barriers and fences at all times. Even when machinery has stopped moving during a break in work or on evenings and weekends, the fenced off areas are to be entered only by authorized personnel wearing the required safety equipment.

Please follow any instructions given by the contractor, Brycon Construction, especially when inside the active work area. These instructions are for your safety and the safety of the workers in the area. We appreciate your understanding of this important safety reminder.

Project Timeframe

What to Expect

The contractor will have heavy equipment on the roads to facilitate stream reconstruction. Traffic will at times be delayed as temporary traffic control measures may be in place in the areas of work. Work will also be progressing within the channel. Residents can expect to see heavy equipment within the channel removing the existing walls.
