

December 19, 2019

Good news! Our project is substantially complete (all of the major work is done).

On behalf of the project team, I would like to thank you for your patience and cooperation during this major infrastructure improvement project. It was indeed challenging and the community's cooperation made things that much easier. On numerous occasions, the contractor had commented positively on that very fact.

We also want to recognize your efforts to have private property inspections undertaken and for making repairs such as connecting to the new stormwater system in the street.

The streets are now fully open to traffic and on street parking. Please take note of whatever HRM signage may exist in the area.

The majority of project deficiencies (small parts of the project that are not done yet) have been addressed. The remaining deficiencies will be completed in the spring. In addition to the cleanup of deficiencies, there is some further work needed in Ellenvale Run as required by environmental regulation. A thalweg (a line/channel drawn to join the lowest points along the entire length of a stream bed) will be established on the Ellenvale Run section between Tobin Drive and the pedestrian bridge. This work will be completed during low summer flows and will involve mostly handwork.
