

April 30, 2020

Dexter Construction, on behalf of Halifax Water and Halifax Regional Municipality, will be upgrading infrastructure on Federal Avenue, Romans Avenue and McAlpine Avenue.

Halifax Water's work will include the installation of new water main and storm sewer. The municipality will be undertaking various street improvements, including curb, gutter and new pavement work. See the map on the back of this notice for more project details.

## Water Service Shutdown for Temporary Water Connections

**If your property is within the shaded area on the attached map, your property will be connected to temporary water.**

Dexter Construction will be connecting buildings in the project area to a temporary water system that brings water from fire hydrants in the surrounding area (that will not be impacted by this work) to each impacted property so that the water mains that normally provide those properties with water can be replaced without customers having to go without water service for the length of the project.

**Water service must be temporarily turned off at each property as Dexter Construction disconnects each property from the old water connection and onto the temporary water connection.**

On Monday, May 4, Dexter Construction will begin connecting the temporary water lines to the properties shown on the attached map. This work will take 1-2 weeks to complete (weather permitting). When Dexter Construction is making the connection at your property, they will need to disconnect your water for approximately 15 minutes. **Connections will take place between 9:00 AM and 5:00 PM.** Once the connection is complete, the building should have regular water service for the length of the project.

These temporary water lines will be disconnected at the end of the project, and each property will be connected to the new water main.

We apologize for any inconvenience that this work may cause, and thank you for your cooperation.

## Construction During COVID-19

From time to time, you will see workers within 2 metres of each other while they work to maintain the critical water, wastewater, and stormwater infrastructure serving your home. Every effort will be made to maintain the 2 metre distance amongst workers, however, some tasks cannot be completed safely otherwise. As an essential service, in these instances, Halifax Water and its contractors are exempt from the current 2-metre social/physical distancing rules. Halifax Water and its contractors will use additional PPE to protect themselves when undertaking these activities.

**We ask that residents please ensure they give construction crews at least 2 metres of distancing as well.**
