

June 29, 2020

Halifax Water through our contractor, Brycon Construction Limited, is upgrading the Caledonia Road Water Transmission Main.

This transmission main plays a vital role in supplying Dartmouth communities with safe drinking water, and this upgrade work will ensure that it is able to continue to do so.

Project Status

Site preparation is currently ongoing, with construction work expected to begin in early-July.

What To Expect

The majority of this project work will take place in Halifax Water Watershed Lands along Lake Lemont, with some work taking place on Tacoma Drive and near the intersection of Main Street and Caledonia Road. Property owners with property facing Lake Lemont, such as Kennedy Drive and Fader Street, may see and hear the work as it progresses through the Lake Lemont Watershed. See attached project area map. Typical hours of work will be 7:00 AM to 6:00 PM.

This work will require temporary water service shutdowns in the area. Notices will be distributed to impacted customers in advance of the shutdowns.

Construction & Contractor Work During COVID-19

Effective June 18th, Public Health Authorities allow for groups of up to 10 people to be within 2 metres of each other, and from time to time, you will see workers within 2 metres of each other while they work to maintain the critical water, wastewater, and stormwater infrastructure serving your home. Halifax Water is still mindful of the recommendations to maintain a 2 metre distance between employees and contractors, and every effort will be made to achieve this. However, some tasks cannot be completed safely otherwise. As an essential service, in these instances, Halifax Water and its contractors have been exempt from the 2 metre social/physical distancing rules. Halifax Water and its contractors will use additional PPE to protect themselves when undertaking these activities.

We ask that residents please ensure they give construction crews at least 2 metres of distancing as well.
