

May 21, 2021

### Project Overview

Halifax Water is upgrading the Russell Lake Wastewater Pump Station (PS) and the wastewater pipe that runs near much of this trail. Wastewater pipe work is scheduled for completion at the end of September 2021. Pump station work is scheduled for completion in June 2022. During construction, it is expected the trail will remain open at all times, or pedestrian detours will be in place to ensure safe passage around the construction activities.

### Upcoming Work: May 25 – June 4

Crews will be on-site near the Russell Lake PS to continue installing environmental controls and for excavation work. There will also be excavation work near Morris Lake PS and Portland Estates Boulevard.

### Construction & Contractor Work During COVID-19

During this project, from time to time, you will see workers within 2 metres of each other while they work to maintain the critical water, wastewater, and stormwater infrastructure serving your home. Halifax Water is still mindful of the recommendations to maintain a 2 metre distance between employees and contractors, and every effort will be made to achieve this. However, some tasks cannot be completed safely otherwise. As an essential service, in these instances, Halifax Water and its contractors have been exempt from the 2 metre social/physical distancing rules. Halifax Water and its contractors will use additional PPE to protect themselves when undertaking these activities.

**We ask that residents please ensure they give construction crews at least 2 metres of distancing as well.**
