

May 14, 2021

Halifax Water owns, operates and maintains over 1500 km of water mains as part of its water distribution network. To continue to provide safe, high-quality drinking water as our communities grow, we're building a rechlorination building near the Sampson Water Reservoir at 73 Sampson Drive, Lower Sackville.

Brycon Construction has been selected to complete this work. This project is expected to begin in mid-May and be complete by mid-June 2021. Work hours for this work will be 7:00 AM to 6:00 PM, Monday to Friday. This work will take place off the street and will not significantly impact traffic in the area. Access to the trail in this area will be maintained during the majority of this project.

There are no anticipated interruptions to water service planned for this project.
