## Hornes Road & Area Inflow & Infiltration (I&I) Project

Halifax Water has been conducting an Inflow and Infiltration Project on Hornes Road, Janice Anne Drive and Scott Drive to identify and separate stormwater flows from wastewater plumbing in buildings on private properties.

This separation at the source initiative is part of a long-term plan to reduce pressure on Halifax Water's wastewater system, which will help eliminate overflows into the environment or sewer backups into homes. As a property owner, fixing your wastewater system benefits you by optimizing your property value, avoiding insurance claims and exercising environmental stewardship.

During previous communications in 2020, we distributed a Community Notice 1, provided a webinar presentation and sent a personalized letter to each property owner about addressing inflow and infiltration of stormwater into the wastewater.

## Private Property Inspections

Halifax Water identified and will now be conducting **mandatory private property inspections**. These inspections will be conducted inside and outside of your property to identify possible stormwater connections that need to be addressed by the property owner.

We will be sending each property owner a letter about how to schedule your appointment in **October 2021**. If you have received this notice and are not the property owner, please pass along this information and be prepared to facilitate this inspection.

During inspections, we ask that all public health guidelines related to COVID-19 be observed. Halifax Water staff will ensure proper protective equipment is worn, and safety protocols will be discussed with each property owner prior to entry into your residence.

## Learn More About this Project

For specific information about the Hornes Road and Area Inflow and Infiltration Project, including the October 6, 2020 webinar recording that described examples of inflow and infiltration issues that may exist at your property, visit: [halifaxwater.ca/hornes-road](https://www.halifaxwater.ca/hornes-road)
