

November 30, 2021

Halifax Water, through its contractor, Landmark Structures Co., is constructing a new water storage reservoir to better serve your community. The new water reservoir is being constructed at Halifax Water's existing property on Masthead Court in Bedford.

All welding on the steel structure is now complete and the boilermakers have demobilized from the site. The reservoir dome is fully coated with the shell remaining to be sand blasting, priming and finish coats. The interior of the reservoir also requires sand blasting, priming and finish coats. The interior and exterior coating work is anticipated to start in Late March 2022 and be complete by early June 2022.

### Upcoming Work

On behalf of Halifax Water, Landmark Structures Co. are working to install the underground infrastructure and perimeter fencing around the tank in the coming weeks. The work site is expected to be active until late December 2021.

### Construction & Contractor Work During COVID-19

During this project, from time to time, you will see workers within 2 metres of each other while they work to maintain the critical water, wastewater, and stormwater infrastructure serving your home. Halifax Water is still mindful of the recommendations to maintain a 2 metre distance between employees and contractors, and every effort will be made to achieve this. However, some tasks cannot be completed safely otherwise. As an essential service, in these instances, Halifax Water and its contractors have been exempt from the 2 metre social/physical distancing rules. Halifax Water and its contractors will use additional PPE to protect themselves when undertaking these activities.

**We ask that residents please ensure they give construction crews at least 2 metres of distancing as well.**
